

## REUSABLE WASHABLE FACE MASK

We've made a commitment to get non-medical face masks into the hands and homes of our families, restaurants, small businesses, and communities impacted by COVID-19. Help us make a difference.

Our masks are created using the Centers for Disease Control and Prevention guidelines.

### Hand-crafted with Love

Our production team is hard at work ensuring every stitch is reinforced with durable thread, high-quality craftsmanship, and a love for our essential heroes on the frontlines.

The time is now to **get a 95% filtering mask** with PM2.5 Inserts that you can use and reuse for the long term. Keep safe and secure without compromising your aesthetic taste by wearing soft and comfortable cotton face masks. Made from 100% cotton with stretchable ear loops, these cute cotton organic washable face masks fit snugly but comfortably against the side of the face, providing unsurpassed protection.

-  These masks fit nice, they are comfortable and have a compartment for replaceable filters.
-  With proper use, these masks fit better than standard disposable masks which helps prevent air from escaping or bypassing the mask and filter.
-  The filters use an active carbon layer between 2 separate layers of melt-blown fabric material between a further 2 layers of moisture-resistant soft material known as PM2.5 Filters.
-  These masks will protect you against the majority of particulate matter, gases, odors, dust, pollen, and smog that passes through the filter (when used with proper filter).

## FEATURES

-  Color Available: Blue and Black
